Continuation of Substance of Interview including description of the general nature of what was discussed: Applicant's representative was contacted regarding a possible Examiner's Amendment. Specifically, claim 21 required a change to properly indicate antecedent basis. Additionally, changes were required to the Abstract to remove impermissible "legal language." Applicant's representative, while not acquiescing to the correctness of the Office's position, approved the Examiner's Amendment for the sole purpose of furthering prosecution of the application to allowance. It was also requested that the first line of the specification be amended to indicate the International Application was published in English under PCT Article 13(2).
